

# BYG DIN EGN MÅNE ROBOT

Før du begynder. Skal du have forberedt;

- Masser af pap
- lineal
- blyant
- Sakse
- Lim og limpistol
- passer

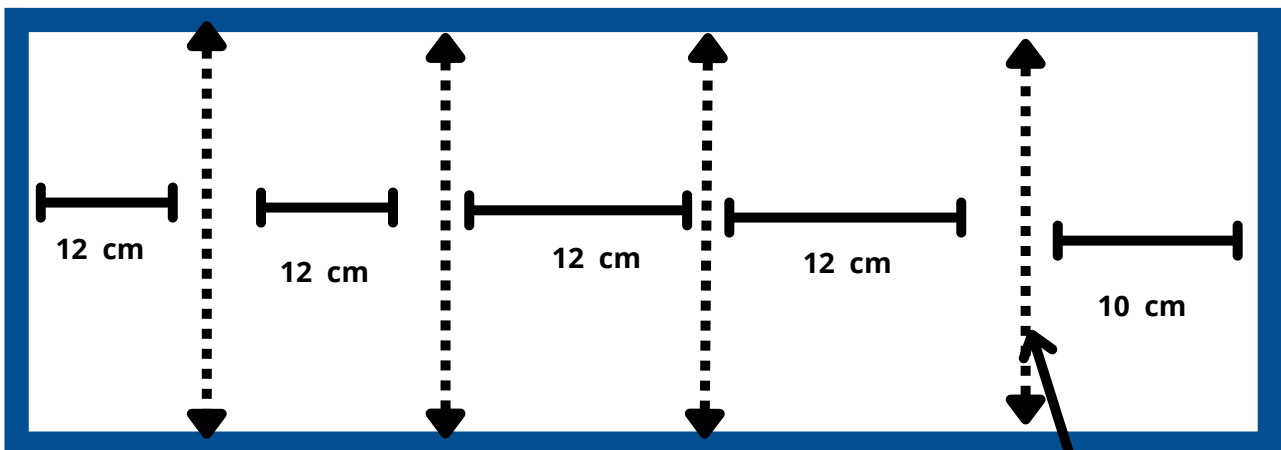

En god værktøjskasse, som er godt at have anskaffet, er Makedo toolkit. Deri ligger sav, markører, møtrikker og skruetrækker. Med Makedo Toolkit har man alt det, som en ingeniør skal bruge til at bygge sin månerobot

# KROPPEN

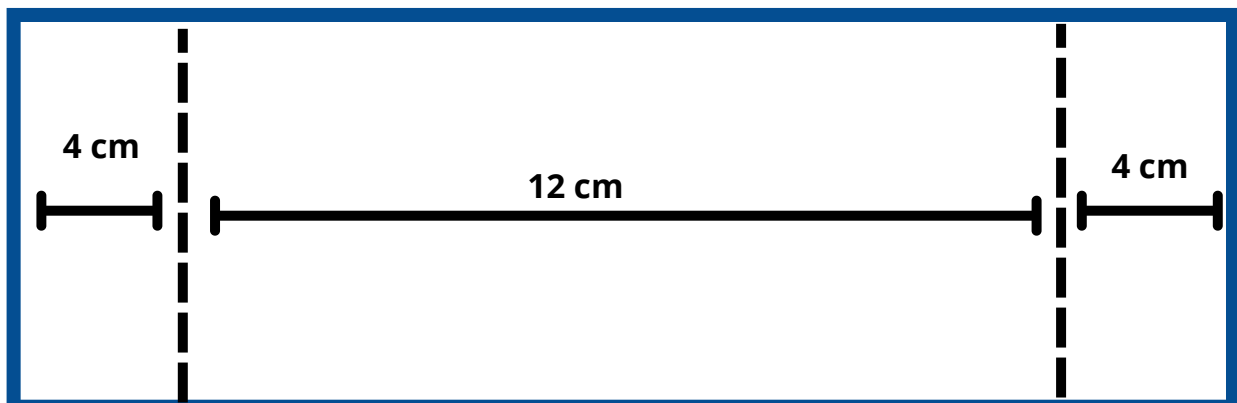

P.S. DE STRIBLEDE LINJER ER DER HVOR MAN BUKKER PAPPET.

58cm lang

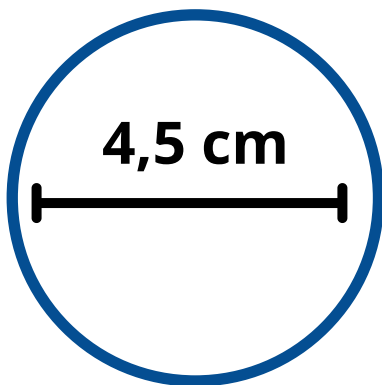

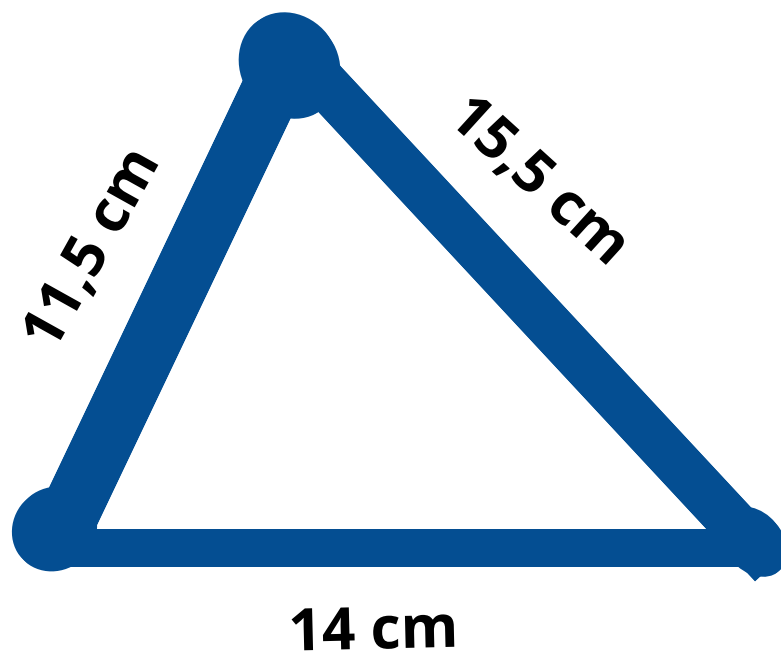

Toppen på kroppen

20 cm

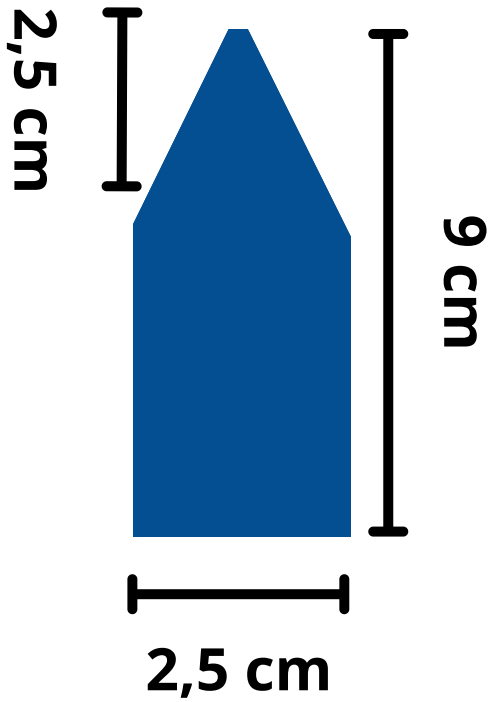

# HJULENE

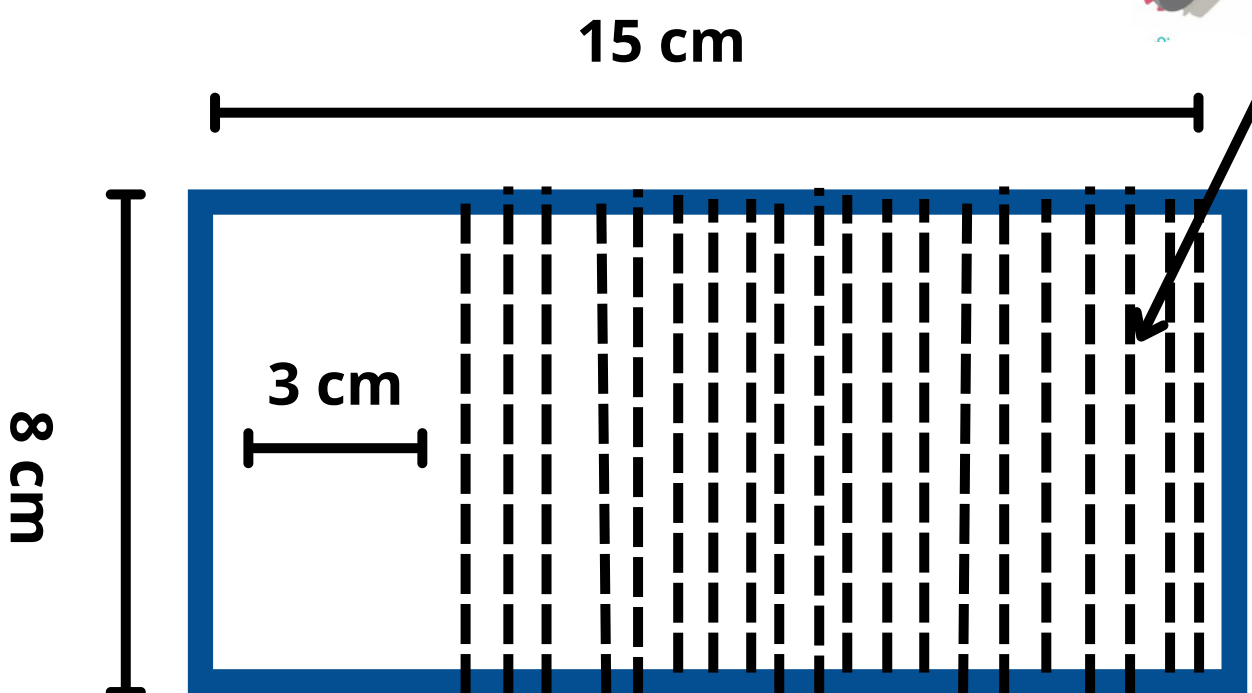

**laver minimum 6 hjul**

**HALS  
OG  
HOVEDE**

**HALSEN**
